

4014.130 FL/FL-EN

Mounting details
Refer to drill table hole pitches

Features:
Non Locking (FL)
Lock Out (FL-EN) LH & RH Pair

Configuration Table												
Part Number	Installation Length "L"	Extension Length "T"	Drill Table							Weight (KG/Each)	QTY/BOX	Load (KG/Pair)

Options: Various dimensions of the main profile, slide lengths, extensions, drillings and hole centres to customer requirements

We recommend use the major axis, do not dismantle the slide! The maximum safe load is given for a fully extended pair of slides, mounted on the major axis, with a load spread uniformly along the inner beam.

Material:

- Beams: Automotive grade aluminium 7N01 T5. Clear anodised
- Ball bearings: Hardened steel & chromed
- Cages: Plated steel. Caged ball bearings for smooth extension
- Standard surface finish meets MIL-A-8625 Type II
- Silent & light weight: 30% the weight of steel slides
